

Environmental policy:

- PBF Group B.V. is an environmentally responsible company. We have added environmental protection to our paramount business objectives and it is part of our main business principles. We ensure that this is implemented with specific targets and rules of conduct within all operational levels and capacities.
- Our environmental protection efforts include compliance with all laws, decrees, terms issued by government agencies and self-imposed internal standards, as well as the prevention of environmental pollution and the continuous improvement of our environmental protection activities.
- Production methods are aimed to reduce any negative impact on the environment. This will be achieved by reducing the consumption and waste of raw materials, energy sources and water to a minimum. SFC Group also encourages waste reduction and to recycle waste in a responsible way.
- We commit ourselves to evaluate the implications of our existing activities on the environment in regular intervals and to conduct an evaluation when implementing new procedures to reduce possible impacts on the environment. This allows us to detect weak points, to determine necessary measures and to document the achieved improvements.
- We inform our stakeholders in detail about environmental aspects concerning our products and motivate them to act with environmental consciousness. We are willing to have open discussions with all stakeholders. We provide environmentally relevant information about our company to the public and cooperate with public authorities, organizations and other institutions in environmental protection matters.
